RESEARCH COMPOUND CATALOGUE

Internal Price Schedule

Prepared: 30 July 2026

Pricing in South African Rand (ZAR), Reconstituted (Pen).

Excludes courier delivery.
Subject to change without notice.

CONFIDENTIAL — INTERNAL USE (product codes shown)

1. Tissue Repair & Recovery

Peptides studied for healing, recovery and connective-tissue support.

Image	Product & Research Notes	Retail (ZAR)
	BPC-157 10mg Product Code: BPC10 Promotes blood-vessel formation, reduces inflammation and protects cells from damage — studied to speed the healing response in soft tissue, gut lining and joints.	R775
	TB-500 10mg Product Code: TB10 Promotes migration of stem cells to injured areas, helps form new blood vessels, reduces inflammation and prevents excessive scar tissue; often studied alongside BPC-157 for combined soft-tissue recovery.	R1,075
	CJC-1295 + Ipamorelin Product Code: CJIP CJC-1295 extends how long each natural growth-hormone pulse lasts while Ipamorelin adds extra pulses, together creating a sustained increase in natural GH release — researched for recovery, body composition and sleep quality.	R1,025
	CJC-1295 (No DAC) 10mg Product Code: CJD10 Extends the duration of the body's natural growth-hormone pulse for more sustained release without shutting down natural production — a popular short-acting option for GH-pulse research.	R975
	DSIP 10mg Product Code: DSP10 Crosses the blood-brain barrier and interacts with the central nervous system to promote delta-wave (deep, restorative) sleep — a key subject in sleep-cycle research.	R975
	Ipamorelin 10mg Product Code: IPA10 Mimics ghrelin to selectively stimulate growth-hormone release; studied for increased GH without materially disturbing cortisol or appetite hormones.	R725

Image	Product & Research Notes	Retail (ZAR)
	Pinealon 10mg Product Code: PIN10 Investigated for its potential to support neuronal health, cognitive performance and cellular resilience.	R825
	TB-500 10mg (Alt SKU) Product Code: TB10A Promotes migration of stem cells to injured areas, helps form new blood vessels, reduces inflammation and prevents excessive scar tissue; often studied alongside BPC-157 for combined soft-tissue recovery.	R1,075
	TB-500 5mg Product Code: TB5 Promotes migration of stem cells to injured areas, helps form new blood vessels, reduces inflammation and prevents excessive scar tissue; often studied alongside BPC-157 for combined soft-tissue recovery.	R775
	VIP 10mg Product Code: VIP10 Modulates immune responses, reduces inflammatory cytokines, improves gut-barrier function and protects neurons — studied in gut-immune-brain communication.	R1,575
	BPC-157 5mg Product Code: BPC5 Promotes blood-vessel formation, reduces inflammation and protects cells from damage — studied to speed the healing response in soft tissue, gut lining and joints.	R626
	ARA-290 10mg Product Code: ARA10 A non-erythropoietic EPO derivative studied for activating the innate repair receptor to reduce inflammation and support nerve and tissue repair.	R745
	KPV 10mg Product Code: KPV10 A tripeptide fragment of alpha-MSH studied for its anti-inflammatory action in the gut and skin and for supporting tissue healing.	R675

Image	Product & Research Notes	Retail (ZAR)
	Sermorelin 10mg Product Code: SRM10 A growth-hormone-releasing hormone analogue that signals the pituitary to release growth hormone naturally; studied for recovery, body composition and sleep.	R1,075
	BPC-157 10mg Research Pen Product Code: BPC10P Reconstituted research-pen format for convenient, pre-measured dosing. Promotes blood-vessel formation, reduces inflammation and protects cells from damage — studied to speed the healing response in soft tissue, gut lining and joints.	R1,125
	CJC-1295 + Ipamorelin Research Pen Product Code: CJIPP Reconstituted research-pen format for convenient, pre-measured dosing. CJC-1295 extends how long each natural growth-hormone pulse lasts while Ipamorelin adds extra pulses, together creating a sustained increase in natural GH release — researched for recovery, body composition and sleep quality.	R1,375
	DSIP 10mg Research Pen Product Code: DSP10P Reconstituted research-pen format for convenient, pre-measured dosing. Crosses the blood-brain barrier and interacts with the central nervous system to promote delta-wave (deep, restorative) sleep — a key subject in sleep-cycle research.	R1,325
	KPV 10mg Research Pen Product Code: KPV10P Reconstituted research-pen format for convenient, pre-measured dosing. A tripeptide fragment of alpha-MSH studied for its anti-inflammatory action in the gut and skin and for supporting tissue healing.	R1,025
	TB-500 10mg Research Pen Product Code: TB10P Reconstituted research-pen format for convenient, pre-measured dosing. Promotes migration of stem cells to injured areas, helps form new blood vessels, reduces inflammation and prevents excessive scar tissue; often studied alongside BPC-157 for combined soft-tissue recovery.	R1,425

2. Metabolic & Weight Management

Compounds researched for metabolic, appetite and body-composition pathways.

Image	Product & Research Notes	Retail (ZAR)
	AOD-9604 Product Code: AOD Mimics the way natural growth hormone regulates fat metabolism, helping break down stored fat and prevent new fat formation without the broader effects of full-length GH.	R896
	IGF-1 LR3 Product Code: IGF1 Binds IGF-1 receptors to support anabolic signalling, protein synthesis, recovery pathways and metabolic regulation over an extended half-life.	R1,575
	Kisspeptin 10mg Product Code: KS10 Activates the hypothalamic-pituitary-gonadal axis, stimulating release of LH and FSH — a core subject in reproductive-hormone research.	R975
	MOTS-c 10mg Product Code: MS10 Improves how mitochondria produce energy, helping cells burn fat and use glucose more efficiently, and activates AMPK — a key pathway in exercise and metabolic research.	R815
	MOTS-c 20mg Product Code: MS20 Improves how mitochondria produce energy, helping cells burn fat and use glucose more efficiently, and activates AMPK — a key pathway in exercise and metabolic research.	R1,075
	MOTS-c 40mg Product Code: MS40 Improves how mitochondria produce energy, helping cells burn fat and use glucose more efficiently, and activates AMPK — a key pathway in exercise and metabolic research.	R1,375

Image	Product & Research Notes	Retail (ZAR)
	NAD+ 500mg Product Code: NAD500 Acts as a helper molecule in hundreds of metabolic processes, especially mitochondrial energy production; elevated NAD+ is studied for cellular energy and repair pathways central to longevity research.	R875
	Retatrutide 10mg Product Code: RT10 Activates GIP, GLP-1 and glucagon receptors — supporting satiety, more effective insulin use and increased energy expenditure; one of the most closely watched compounds in current metabolic research.	R1,075
	Retatrutide 20mg Product Code: RT20 Activates GIP, GLP-1 and glucagon receptors — supporting satiety, more effective insulin use and increased energy expenditure; one of the most closely watched compounds in current metabolic research.	R1,475
	Retatrutide 30mg Product Code: RT30 Activates GIP, GLP-1 and glucagon receptors — supporting satiety, more effective insulin use and increased energy expenditure; one of the most closely watched compounds in current metabolic research.	R1,775
	Retatrutide 40mg Product Code: RT40 Activates GIP, GLP-1 and glucagon receptors — supporting satiety, more effective insulin use and increased energy expenditure; one of the most closely watched compounds in current metabolic research.	R2,175
	Tesamorelin 10mg Product Code: TS10 Signals the pituitary gland to release growth hormone naturally rather than introducing GH directly; studied for its effect on visceral belly fat linked to metabolic risk.	R1,176
	Tesamorelin 20mg Product Code: TS20 Signals the pituitary gland to release growth hormone naturally rather than introducing GH directly; studied for its effect on visceral belly fat linked to metabolic risk.	R1,775

Image	Product & Research Notes	Retail (ZAR)
	Tirzepatide Product Code: TZ Investigated for its potential to support glucose-dependent insulin secretion, appetite regulation and gastric-emptying pathways.	R1,276
	Tesamorelin 5mg Product Code: TS5 Signals the pituitary gland to release growth hormone naturally rather than introducing GH directly; studied for its effect on visceral belly fat linked to metabolic risk.	R926
	5-Amino-1MQ 5mg Product Code: AMQ5 Investigated for whether influencing NNMT pathways may affect energy expenditure, fat metabolism and body-composition regulation.	R601
	Lemon Bottle 10ml Product Code: LMB10 A lipolytic solution studied for localised fat breakdown; a research injectable investigated for body-contouring applications.	R825
	Mazdutide 10mg Product Code: MZ10 A dual GLP-1 and glucagon receptor agonist studied for appetite regulation, glucose control and increased energy expenditure.	R1,575
	NAD+ 1000mg Product Code: NAD1000 Acts as a helper molecule in hundreds of metabolic processes, especially mitochondrial energy production; elevated NAD+ is studied for cellular energy and repair pathways central to longevity research.	R1,275
	Semaglutide 10mg Product Code: SG10 A GLP-1 receptor agonist studied for glucose-dependent insulin secretion, appetite suppression and slowed gastric emptying.	POA

Image	Product & Research Notes	Retail (ZAR)
	Semaglutide 30mg Product Code: SG30 A GLP-1 receptor agonist studied for glucose-dependent insulin secretion, appetite suppression and slowed gastric emptying.	R1,175
	SLU-PP-332 5mg Product Code: SLU5 An ERR agonist ('exercise mimetic') studied for its potential to increase energy expenditure and fat oxidation without physical exertion.	R775
	Tirzepatide 15mg Product Code: TZ15 Investigated for its potential to support glucose-dependent insulin secretion, appetite regulation and gastric-emptying pathways.	R975
	Tirzepatide 30mg Product Code: TZ30 Investigated for its potential to support glucose-dependent insulin secretion, appetite regulation and gastric-emptying pathways.	R1,326
	Tirzepatide 60mg Product Code: TZ60 Investigated for its potential to support glucose-dependent insulin secretion, appetite regulation and gastric-emptying pathways.	R1,875
	NAD+ 1000mg Research Pen Product Code: NAD1000P Reconstituted research-pen format for convenient, pre-measured dosing. Acts as a helper molecule in hundreds of metabolic processes, especially mitochondrial energy production; elevated NAD+ is studied for cellular energy and repair pathways central to longevity research.	R1,625
	Semaglutide 30mg Research Pen Product Code: SG30P Reconstituted research-pen format for convenient, pre-measured dosing. A GLP-1 receptor agonist studied for glucose-dependent insulin secretion, appetite suppression and slowed gastric emptying.	R1,525

Image	Product & Research Notes	Retail (ZAR)
	Tirzepatide 60mg Research Pen Product Code: TZ60P Reconstituted research-pen format for convenient, pre-measured dosing. Investigated for its potential to support glucose-dependent insulin secretion, appetite regulation and gastric-emptying pathways.	R2,225

3. Longevity & Cellular Health

Research compounds explored for cellular ageing, repair and resilience.

Image	Product & Research Notes	Retail (ZAR)
	Epithalon 10mg Product Code: EP10 Activates telomerase to help lengthen telomeres and slow cellular ageing, and regulates melatonin production — linked to circadian and longevity research.	R686
	Epithalon 50mg Product Code: EP50 Activates telomerase to help lengthen telomeres and slow cellular ageing, and regulates melatonin production — linked to circadian and longevity research.	R1,175
	HCG 5000iu Product Code: G5K Investigated for its ability to stimulate endogenous testosterone production and support reproductive function.	R775
	Selank 10mg Product Code: SLK10 Modulates GABA, serotonin and dopamine systems; studied for reducing anxiety and stress without sedation — a focus of cognitive and stress-response research.	R896
	Thymosin Alpha-1 Product Code: THA1 Investigated for its potential to support T-cell maturation, immune signalling and cytokine activity.	R1,325
	Semax 10mg Product Code: SEM10 Increases brain-derived neurotrophic factor (BDNF) to promote neuron growth and survival; studied for effects on focus, mood and cognitive performance.	R896

Image	Product & Research Notes	Retail (ZAR)
	SS-31 50mg Product Code: SS50 Investigated for its ability to bind cardiolipin within the inner mitochondrial membrane, supporting mitochondrial efficiency and ATP production.	R1,875
	FOXO4-DRI Product Code: FOX Disrupts the FOXO4-p53 interaction to allow apoptosis of senescent ('zombie') cells while largely sparing healthy cells — a focus of cellular-ageing research.	R2,175
	SS-31 10mg Product Code: SS10 Investigated for its ability to bind cardiolipin within the inner mitochondrial membrane, supporting mitochondrial efficiency and ATP production.	R1,075
	Glutathione 600mg Product Code: GLU600 The body's master antioxidant, studied for its role in cellular detoxification, oxidative-stress defence and skin brightening.	R675
	Epithalon 50mg Research Pen Product Code: EP50P Reconstituted research-pen format for convenient, pre-measured dosing. Activates telomerase to help lengthen telomeres and slow cellular ageing, and regulates melatonin production — linked to circadian and longevity research.	R1,525

4. Specialty Combination Stacks

Pre-combined blends formulated for convenient multi-pathway research.

Image	Product & Research Notes	Retail (ZAR)
	Wolverine Blend - BPC-157 + TB-500 10mg (5mg+5mg) Product Code: WLV10 A BPC-157 + TB-500 blend (5mg+5mg): BPC-157 targets rapid localised repair of gut, tendons and ligaments while TB-500 promotes whole-body healing, flexibility and blood-vessel formation — researched for accelerated recovery across multiple tissue types.	R976
	BPC-157 + TB-500 20mg Product Code: BT20 A BPC-157 + TB-500 blend: BPC-157 targets rapid localised repair while TB-500 promotes whole-body healing, flexibility and blood-vessel formation — researched for accelerated recovery across multiple tissue types.	R1,376
	GLOW Stack 70mg Product Code: GLW70 A regeneration and skin-quality stack: GHK-Cu promotes collagen production and skin regeneration while companion peptides support tissue remodelling and structural repair as a combined formula.	R1,426
	GHK-Cu 100mg Product Code: GHK100 Stimulates collagen and elastin production, promotes wound healing, reduces inflammation and acts as a powerful antioxidant; the copper complex is widely researched for skin, hair and tissue-remodelling applications.	R975
	GHK-Cu 50mg Product Code: GHK50 Stimulates collagen and elastin production, promotes wound healing, reduces inflammation and acts as a powerful antioxidant; the copper complex is widely researched for skin, hair and tissue-remodelling applications.	R775
	KLOW Stack 80mg Product Code: KLV80 A KLOW stack: GHK-Cu promotes collagen production and copper delivery for skin and tissue regeneration while partner peptides support recovery, hydration and structural repair as a combined formula.	R1,626

5. Hormonal & Vitality

Peptides investigated for hormonal, libido and pigmentation pathways.

Image	Product & Research Notes	Retail (ZAR)
	Melanotan 2 10mg Product Code: MT10 Activates melanocortin receptors in skin cells to trigger melanin production for a protective tan with UV exposure; also studied for effects on appetite and libido.	R776
	PT-141 10mg Product Code: PT10 Activates melanocortin receptors in the hypothalamus to trigger natural sexual arousal and desire; unlike some approaches it does not act directly on blood flow.	R755
	Snap-8 10mg Product Code: SNP10 Studied for its potential to influence neurotransmitter signalling associated with facial muscle contractions — a topical, cosmetic-research peptide.	R675

6. Accessories & Consumables

Reconstitution and delivery consumables for laboratory use.

Image	Product & Research Notes	Retail (ZAR)
	Bacteriostatic Water Product Code: BAC Sterile water containing a small amount of benzyl alcohol, used to reconstitute freeze-dried peptides prior to research use. Not a peptide — an essential laboratory consumable.	Free
	Bacteriostatic Water 10ml Product Code: BAC10 Sterile water containing a small amount of benzyl alcohol, used to reconstitute freeze-dried peptides prior to research use. Not a peptide — an essential laboratory consumable.	R326
	Cartridge Product Code: CRT Replacement cartridge accessory for compatible pen-style reconstitution and delivery devices.	R72
	Disposable Pen Product Code: DPN Single-use pen device for convenient reconstitution and measured delivery of research compounds.	R526
	Bacteriostatic Water 3ml Product Code: BAC3 Sterile water containing a small amount of benzyl alcohol, used to reconstitute freeze-dried peptides prior to research use. Not a peptide — an essential laboratory consumable.	R276

7. Options & Delivery

Cold-chain packaging and courier options added at checkout.

Image	Product & Research Notes	Retail (ZAR)
 Ice Pack Product Code: ICE Reusable ice pack for temperature-controlled shipping of research compounds.		R35
 Thermal Bag Product Code: TBG Insulated thermal bag for temperature-controlled delivery of research compounds.		R100
 Delivery — Local Product Code: DLL Local courier delivery within the metro area.		R145
 Delivery — National Product Code: DLN National courier delivery across South Africa.		R249
